### Message from Susumu Shingu

Genki-nobori is the project that I started to send the encouraging message to the people of the stricken area when the Great North-Japan Earthquake happened in 2011. The project has been continuing since then, and the sympathizers send windsocks from Germany and Alaska. Your messages will swell with the wind and flutter to send the encouragement.

**Leader: Sanda-Yume-Taishi (Sanda city) - Susumu Shingu**

**Participation: 30 groups (including primary school students in Sanda, and children of International schools in Kansai area.)**
